EDUCATION

PHD, PLANT PHYSIOLOGY 2017–2021 (expected)

Stockholms Universitet, Sweden

Project: Functional and Genetic Analysis of Laccase Isoforms during Lignification

Advisor: Dr. Edouard Pesquet

Co-Advisors: Prof. Vincent Bulone, Prof. Jonas Gunnarsson

My project aims to determine whether differences in lignin amount and composition on the cellular and organismal scale are due to distinct roles of laccase paralogues during lignification. Biochemical and genetic analyses of laccases from *A. thaliana*, *Zinnia violacea* and *Populus* will be used to elucidate the basis of laccase specificity as well as the evolutionary conservation of the roles of laccases in lignification.

MASTER OF SCIENCE, GENETIC AND MOLECULAR PLANT BIOLOGY 2015–2017

Uppsala Universitet, Sweden

Thesis: Distinct Roles of Laccase Isoforms During Lignification in *A. thaliana*

Advisor: Dr. Edouard Pesquet

In this thesis work, I provided evidence that laccase isoforms in *A. thaliana* have distinct and non-redundant roles during lignification. Phenotypic analysis of *laccase* loss-of-function mutants, *in situ* activity assays and biochemical lignin characterisation showed that different laccase isoforms were active in a cell and substrate specific manner.

BACHELOR OF SCIENCE, BIOLOGY 2013–2015

Ernst-Moritz-Arndt-Universität Greifswald, Germany

Thesis: Plasma Membrane-Bound Proteases in the Roots of *H. vulgare* (grade: 1.0)

Advisor: Prof. Christine Stöhr

In my bachelor's thesis I investigated proteolytic activity in the plasma membrane of *Hordeum vulgare* roots. Plasma membrane purification and SDS-PAGE analysis followed by zymographic and chromogenic activity assays provided evidence for the presence of an undescribed oligomeric membrane-bound aminopeptidase.

EXPERTISE

LABORATORY

Quantitative bright field and fluorescence microscopy, enzyme kinetics, image analysis, cell suspension cultures, histology, cloning, transformation, crossing

COMPUTATIONAL

R, LaTeX, ImageJ, git, HTML (basics), Perl & Python (basics), Unix, Linux, Windows

COURSES & WORKSHOPS

Advanced Imaging of Cells *in vitro* and *in vivo* (2018). *Stockholm University*

Optical Clearing and Expansion Microscopy (2018). *SciLifeLab, Stockholm*

Advances in Enzyme Regulation (2018). *Swedish University of Agricultural Sciences, Uppsala*

Piecewise Structural Equation Modelling (2019). *Stockholm University*

PUBLICATIONS

Blaschek L, Champagne A, Dimotakis C, Nuoendagula, Décou R, Hishiyama S, Kratzer S, Kajita S, Pesquet E (*submitted*). Elucidation of the Wiesner Test for Quantitative Lignin Determination.

Blaschek L, Pesquet E (*in preparation*). Phenoloxidases: Functions, Structures and Evolution.

Ménard D, Serk H, Gorzsás A, Jauneau A, Fukuda H, **Blaschek L**, Demura T, Goffner D, Pesquet E (*in preparation*). The *post-mortem* spatial restriction of lignification in protoxylem and metxylem vessels in *Zinnia elegans* is controlled by laccases and peroxidases.

PRESENTATIONS

Blaschek, L (2018). Determining the Spatial Distribution of Aldehyde Units in Lignin. *2nd Stockholm Cell Wall Meeting*, KTH Royal Institute of Technology, Stockholm.

Blaschek, L (2019). Spatial Distribution of Coniferaldehyde Lignin. *28th Congress of the Scandinavian Plant Physiology Society*, Umeå.

GRANTS & SCHOLARSHIPS

Kungliga Vetenskapsakademien Scholarship BS2018–0061 (100 000 kr) for the sequencing of the *Zinnia violacea* genome (2018).
